BIO

[PhD Candidate in the Department of Politics and International Studies at the University of Warwick](#), where she is a recipient of the Chancellor's International Scholarship.

Her research explores positionality and agency in International Relations through the foreign policy discourses of intermediate states in the Global South. Focusing on Brazil, South Africa, and Indonesia, she examines how these states position themselves within the international order, navigating the tension between claims to autonomy and hierarchical constraints. The project combines qualitative content analysis of official speeches (from the late 1980s and early 1990s to 2024) with interviews conducted with members of the foreign policy community. It engages with debates in hierarchy studies, discourse analysis, and diplomatic studies.

She is affiliated with the Centre for the Study of Globalisation and Regionalisation, the Latin America at Warwick Network, and the International Relations and Security Excellence Cluster. She recently held visiting fellowships at Monash University (Melbourne) and Universitas Islam Internasional Indonesia (Jarkarta).
